

Working Group Focus Areas

Recharge Group:

- Private recharge and catchment projects to increase water supply

Big Projects:

- College Lake, nightly/in-season use, and winter/off-season storage

Land Management and Irrigation BP:

- Training and education, and irrigation technology

Communications:

- Centralized, easily accessible and coordinated information about the water issue and progress toward solutions, ongoing engagement

Land Management and Irrigation Best Practices

Goals:

Irrigation Education and Training

- Hold workshops to help growers prepare their own farm water conservation and irrigation water management plans.
- Grower/Irrigator trainings (Covering water and nutrient management, irrigation systems etc...)

Hortau

- Coordinate Establishment of Hortau network and determine funding method
- Better understand tension based irrigation and tension triggers

Communications Group

Goals:

- Be the “glue” for the effort
- Ensure current members are informed
- Updates of overall Dialogue effort, working group status and other relative issues on www.pajarowatershed.org website
- Orient new members and general public

Process:

- Meeting notes – summary style – reviewed & approved by committee – posted on website
 - List participants
 - Key take-aways
 - Action items
