Equipment Review

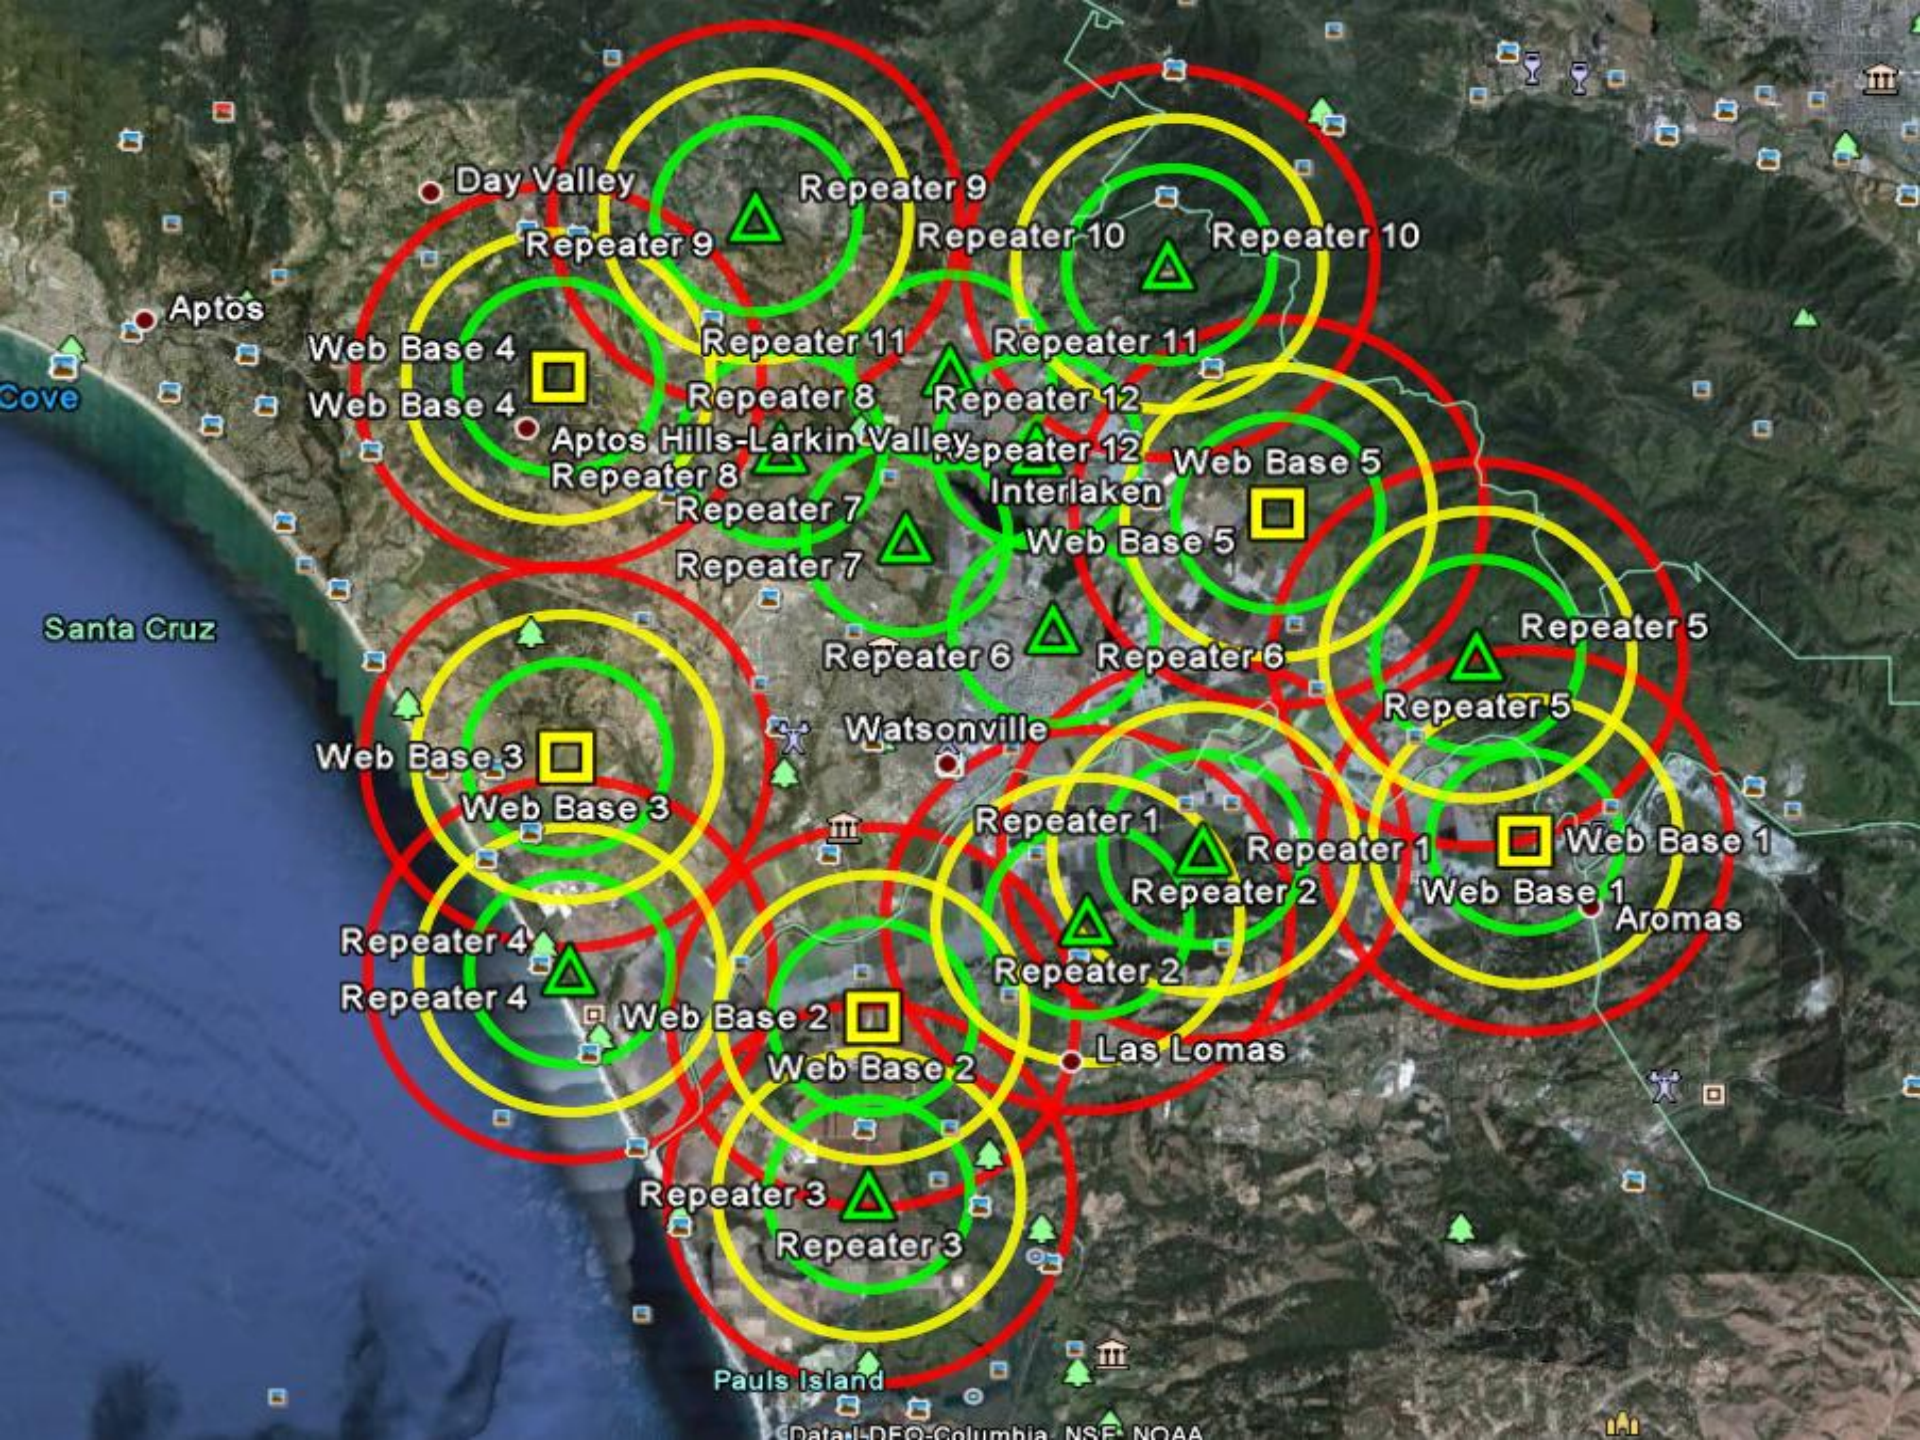

Equipment Review

Existing equipment

- 4 Towers placed at different ranch locations in the valley
- 2 Repeater stations in the valley
- Multiple probes

Investment

- 8-10 repeating stations and strategic placement of existing equipment
- Estimated Maximum cost \$35,000
- Previous commitment by community groups

Network Management

- Hortau willing to manage network
- Existing equipment donated to network
- With purchase of a “probe” any grower within network range can join network.

Hurdles

- Location of equipment (private Property)?
- Funding source for additional equipment and repairs?
- Interest from growers currently not utilizing technology?
- Management of network

Questions
